

MEMORANDUM

TO: Southwest Washington Regional Transportation Council Board of Directors
FROM: Matt Ransom, Executive Director
DATE: June 28, 2016 
SUBJECT: **Regional Port Updates**

INTRODUCTION

RTC's has five Port districts within its three-county service area. Each of these Ports provides a myriad of services to support land development, job growth, and recreational access within their respective communities. A major component of each Port's mission is to provide transportation infrastructure in the form of roadways, railways, and trail facilities. These facilities are often the subject of grant applications to RTC and other state and federal agencies.

PORT UPDATES

Representatives from each RTC region Port have been invited to present to the RTC Board a vision of their strategic needs and issues, and generally to provide a report on "what is happening" within their district. This informational update is intended to attune the RTC Board's awareness of Port planning and project needs within the RTC region.

Port presentations at RTC Board meeting:

- Port of Vancouver
- Port of Ridgefield
- Port of Klickitat

Ports not available to present due to scheduling conflict:

- Port of Camas / Washougal
- Port of Skamania County

(In lieu of presenting, information was provided and will be distributed on behalf of these Ports.)
