

NE 47th Avenue/NE 78th Street Intersection

Project Completed: December 2015

Project Information

RTC funding: \$1,000,000 in STP Funds

Total Project Cost: \$2,402,000

Project Type: Intersection Improvement

Project Length: 0.02 miles

Project Description

Reconstruct urban intersection to correct skewed alignment, installing a new traffic signal, reconfiguring roadway striping, upgrading railroad crossing through the intersection and improving access into Clark County's Operations Center.

Project Benefits

- Reduces collisions by reconfiguring intersection to eliminate skewed legs.
- New/upgraded traffic signal better manages train, vehicle and pedestrian traffic at this intersection.
- Improves safety for vehicles entering and leaving the Public Works Operations Center.

Project Funding

Phase	Year	Federal Funds	Other Funds	Total
Design	2013	0	289,000	289,000
Right of Way		0	1,000	1,000
Construction	2015	1,000,000	1,112,000	2,112,000
Total		1,000,000	1,402,000	2,402,000
