

Regional Communications Plan

Regional Transportation Council

Project Completed: September, 2016

Project Information

RTC funding: \$43,000

Total Project Cost: \$50,000

Project Type: Regional Planning

Project Length: n/a

Function Class: n/a

Daily Traffic Volume: n/a

Project Description

This Regional Communications Plan developed a strategy to meet the regional fiber, network and device needs to support real-time management of the transportation system as well as the exchange of data and information between signal systems and transportation centers. It recommended actions and standards to maintain and enhance the regional communications network's ability to contribute to an efficient, accessible, and connected transportation system. It was developed through a collaborative effort between local agencies.

Project Benefits

- Improved performance of the existing communications infrastructure and prepared for future needs.
- Enhanced operations and cost savings through shared communications systems.
- Planned for robust network with redundant communications paths to withstand outages.

Project Funding

Phase	Year	Federal Funds	Other Funds	Total
PE	2015-2016	\$43,000	\$7,000	\$50,000
Right of Way				
Construction				
Total		\$43,000	\$7,000	\$50,000
